

SAVING WATER IN THE BATHROOM!

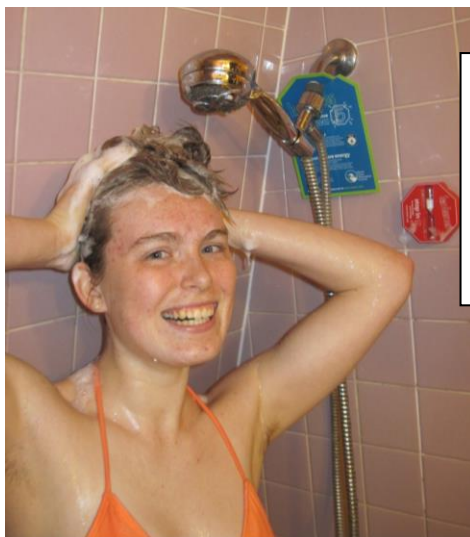

Emma is waiting patiently for a shower...

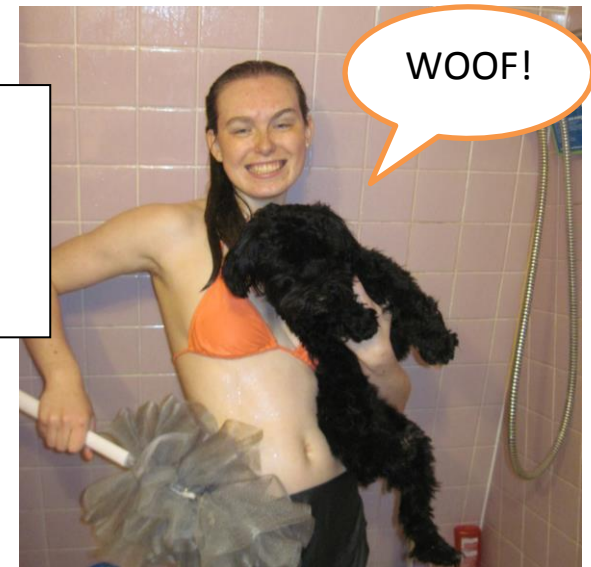

Lauren's been in there singing for way longer than 5 minutes!

Look, Lauren, 5 minutes is the rule. You know that! 😊

*Thanks for the reminder, Emma!
But, look, at least I remembered to turn off the water when I was washing my hair! I'm even showering with a friend!!!*

Linder House also reuses Grey Water from the shower. When Lauren fills up the bucket in the shower, Emma uses it to flush the toilet.

Look how much water that saved!

Saving Water in the Laundry Room!

“I guess I’ll just wash this towel by itself,” says Lauren.

Lauren’s towel is filthy! Looks like it’s time to do laundry. Too bad nothing else is dirty.

“Lauren, wait!” Emma, the Linder-house sustainability steward and local H2O Hero jumps in.

Oh! Now I get it!

“You can fill that washer with so much more. How about all the dirty aprons?”

“Look, by filling the washer all the way, you can be more efficient with your water use. You can even set the washer to cold to save on energy!”
