Healthy Lakes Initiative

Support for shoreland property owners to advance lake health

Monitoring your lake's water quality and learning how you can best protect it using lake-friendly practices on your property is an investment in your lake's future health!

If you own property on Joslin, South or Bruin, Blind or Halfmoon lakes in Washtenaw County, or on Bass Lake in Livingston County **come learn about our Healthy Lakes Initiative and share what you love about your lake.**

We are supporting residents and shoreland property owners on the six project lakes in connecting with leading Michigan-wide programs in lakes protection—the Cooperative Lakes Monitoring Program (CLMP) and the Michigan Shoreland Stewards Program (MiSSP).

Questions? Contact Pam Labadie at plabadie@hrwc.org, (734) 519-0342.

Follow the QR Code to learn more, sign up for project updates or RSVP to the resident meeting!
